SEIKO HISTORY

- 1881** K. Hattori, predecessor of today's Seiko Holdings Corporation, established.
- 1892** Seikosha clock supply factory established; production of wall clocks begins.
Seikosha builds the first pocket watch.
- 1913** Production of Laurel, the first wristwatch made in Japan begins.
- 1953** SEIKO sponsors Japan's first TV commercial.
- 1959** SEIKO commercializes quartz clocks for broadcasting use.
- 1964** SEIKO develops the portable quartz chronometer and Seiko serves as Official Timer for the "Games of the XVIII Olympiad" held in Tokyo.

- 1968** SEIKO achieves the highest ever score in the Geneva competition and is awarded the "best mechanical wrist chronometer".
- 1969** Introduction of cal. 6139, the world's first automatic chronograph watch equipped with both vertical clutch and column wheel.
Introduction of the world's first quartz watch, "SEIKO Quartz Astron" cal. 3500.
- 1982** Introduction of the world's first TV watch cal. T001.
- 1988** Introduction of the world's first "Auto Quartz" watch cal. 7M42. (later renamed as "Kinetic").
- 1992** Introduction of 1/100th analogue quartz chronograph watch cal. 7T59.

1999 Introduction of the world's first Spring Drive watch cal. 7R68 (hand winding).

Introduction of the Ultimate Kinetic Chronograph cal. 9T82.

2005 Introduction of the Kinetic Perpetual cal. 7D48.

Introduction of the Spring Drive cal. 5R series (automatic winding).

2006 Introduction of the world's first watch with electrophoresis display module cal. G510.

Introduction of the Credor Spring Drive Sonnerie cal. 7R06.

Suggested retail price: 15 million Japanese Yen.

2007 Introduction of the Kinetic Direct Drive cal. 5D44.

Introduction of the Spring Drive Chronograph cal. 5R86 equipped with both vertical clutch and column wheel.

2009 Introduction of the Chronograph Perpetual.

2010 World's first EPD watch with an active matrix system.

2011 SEIKO's 130th Anniversary

Served as Official Timer of the IAAF World Championships Daegu 2011.

2012 SEIKO introduces the world's first Solar Powered GPS watch that supports all internationally recognised timezones.

2013 100 years of SEIKO Wrist watches marked by a collection of Special Edition models.

2014 SEIKO introduces the world's first Solar GPS watch with a chronograph.

THE SEIKO WEBSITE

The SEIKO website is designed to provide customers, retailers and consumers with instant access to information about SEIKO. Log onto www.seiko.com.au and click the following links to find out all there is to know about the world's leading watch manufacturer.

Products – Learn more about the SEIKO Premium Collection or explore the entire SEIKO product range.

Support – Designed with retailers in mind, this section provides service information, instruction manuals you can download and 'frequently asked questions' to aid in trouble shooting, procedures for sending back repairs for prompt and efficient service.

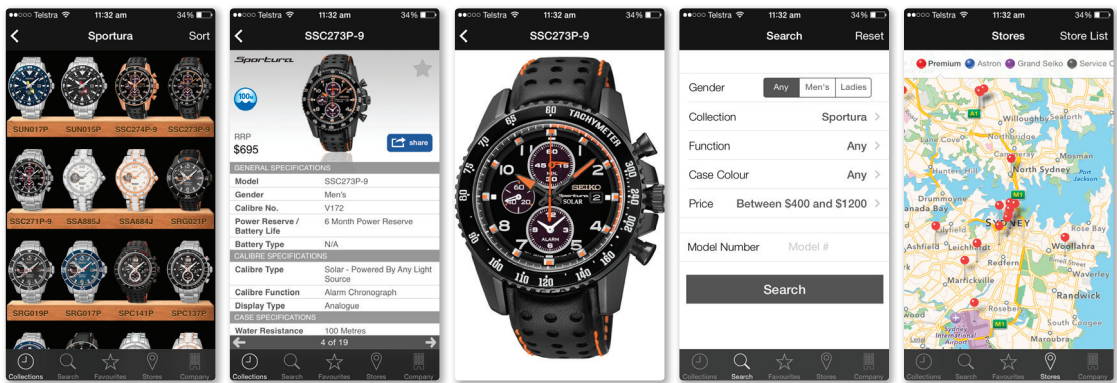

About Us – Discover SEIKO's history from humble beginnings in 1881 and the rise that carried SEIKO to new heights and international renown. Learn about corporate structure, global networks and SEIKO's extensive involvement in sports timing.

Corporate – This section outlines specialised services that include the printing of company logos on the dial of a watch or clock, engraving and personalised messages, as well as customised packaging and more.

SEIKO will continue to grow and evolve and so too will www.seiko.com.au, so keep checking for regular updates. Please send any comments you have to info@seiko.com.au, all feedback is welcome.

www.seiko.com.au

THE SEIKO APP

Find 'SEIKO Australia' in the APP Stores to view the entire SEIKO range. Each watch details specifications, pricing, and a clear image for consumers to view.

There is also important contact information regarding our service centres, online sales policy, and a brief history of SEIKO.

The App is free for Apple and Android products.

BELOW ARE THE ABBREVIATIONS AND SYMBOLS YOU WILL FIND IN THIS CATALOGUE

- ADVERTISED MODEL** — Advertised model
-  — Solar
-  — New release model
-  — Stainless steel case
-  — Water resistance
-  — Titanium
-  — Ceramic

SSC218P \$695 — Reference number and price

SOLAR ALARM CHRONOGRAPH — Watch type

TGP.MHCWR (10BAR) — Case material (refer to Abbreviations page)

SAPPHIRE GLASS — Glass type

M0TA112D0 — Band reference

V172 — Calibre Number

| SNP089P | Sportura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Years | N/A | 7D48 | Analogue | 100 Metres | L01M017M0 | Sapphire | Screw Down | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP091P | Premier | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Years Power Reserve | N/A | 7D56 | Analogue | 100 Metres | M09B311J0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | | | |
| SNP094P | Premier | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Years Power Reserve | N/A | 7D56 | Analogue | 100 Metres | M09B311C0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | | | |
| SNP098P | Premier | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Years Power Reserve | N/A | 7D56 | Analogue | 100 Metres | M09B311J0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | | | |
| SNP100P | Velatura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | M0T5111C0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP101P | Velatura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | M0T5111J0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP101P-2 | Velatura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | R02L011J0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP103P | Velatura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | R02L012J0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP104P | Velatura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | R02L011P0 | Sapphire | Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNP105P-9 | Le Grand Sport | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | M0TA111N9 | Sapphire | Cabochon - Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | | | |
| SNP108P-9 | Coutura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Perpetual | 4 Year Power Reserve | N/A | 7D48 | Analogue | 100 Metres | 34P0XB | Sapphire | Cabochon - Pull Out | | Hour, Minute, Seconds, 24-Hour | Date, Month, Leap Year | Hands & Markers | | |
| SNQ142P | Premier | Quartz - Powered By A Battery | Perpetual Calendar | 4 Year Power Reserve | SR927SW | 6A32 | Analogue | 100 Metres | M09B311C0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | | | |
| SNQ143P | Premier | Quartz - Powered By A Battery | Perpetual Calendar | 4 Year Power Reserve | SR927SW | 6A32 | Analogue | 100 Metres | LOC8011J0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | | | |
| SNZE19K | Conceptual & Regular | Automatic - Powered By The Movement Of The Wearer | Analogue | 36 Hours Power Reserve | N/A | 7S36 | Analogue | 100 Metres | 4K03JA | Hardlex | Pull Out | | Hour, Minute, Seconds | Date, Day Of The Week | Hands & Markers | | |
| SNZE32K | Conceptual & Regular | Automatic - Powered By The Movement Of The Wearer | Analogue | 36 Hours Power Reserve | N/A | 7S36 | Analogue | 50 Metres | 3368KG | Hardlex | Pull Out | | Hour, Minute, Seconds | Date, Day Of The Week | Hands & Markers | | |
| SNZG13K | Conceptual & Regular | Automatic - Powered By The Movement Of The Wearer | Analogue | 36 Hours Power Reserve | N/A | 7S36 | Analogue | 100 Metres | 30021JM | Hardlex | Pull Out | | Hour, Minute, Seconds | Date, Day Of The Week | Hands & Markers | | |
| SPC098P | Conceptual & Regular | Quartz - Powered By A Battery | Chronograph | 3 Years | SR627W | 7T82 | Analogue | 100 Metres | M0GK823N0 | Hardlex | Pull Out | | Hour, Minute, Seconds | Date | Hands & Markers | | |
| SPC127P | Conceptual & Regular | Quartz - Powered By A Battery | Chronograph Perpetual | 5 Years | SR927SW | 7T86 | Analogue | 100 Metres | M0EV211J0 | Hardlex | Pull Out | | Hour, Minute, Seconds | Date, Day Of The Week | | | |
| SPC135P | Sportura | Quartz - Powered By A Battery | Chronograph | 5 Years | SR927SW | 7T04 | Analogue | 100 Metres | M0ND111J0 | Sapphire | Screw Down Crown | | Hour, Minute, Seconds, 24-Hour | Date | Hands & Markers | | |
| SPC137P | Sportura | Quartz - Powered By A Battery | Chronograph | 5 Years | SR927SW | 7T04 | Analogue | 100 Metres | M0ND111J0 | Sapphire | Screw Down Crown | | Hour, Minute, Seconds, 24-Hour | Date | Hands & Markers | | |
| SPC141P | Sportura | Quartz - Powered By A Battery | Chronograph | 5 Years | SR927SW | 7T04 | Analogue | 100 Metres | LOC013M0 | Sapphire | Screw Down Crown | | Hour, Minute, Seconds, 24-Hour | Date | Hands & Markers | | |
| SPC145P | Velatura | Quartz - Powered By A Battery | Yachting Timer | 3 Year Power Reserve | SR927SW | 7T84 | Analogue | 100 Metres | M0T6111J0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | Hands & Markers | | |
| SPC149P | Velatura | Quartz - Powered By A Battery | Yachting Timer | 3 Year Power Reserve | SR927SW | 7T84 | Analogue | 100 Metres | R02L011M0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | Hands & Markers | | |
| SRG009P | Premier | Kinetic - Powered By The Movement Of the Wearer | Kinetic Direct Drive | 1 Month Power Reserve | N/A | 5D22 | Analogue | 100 Metres | M09B211J0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | | | |
| SRG017P | Sportura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Direct Drive | 1 Month Power Reserve | N/A | 5D22 | Analogue | 100 Metres | M0ND111J0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | Hands & Markers | | |
| SRG019P | Sportura | Kinetic - Powered By The Movement Of the Wearer | Kinetic Direct Drive | 1 Month Power Reserve | N/A | 5D22 | Analogue | 100 Metres | M0ND111J0 | Sapphire | Pull Out | | Hour, Minute, Seconds | Date | Hands & Markers | | |

Oscillating Weight

Movement of the wearer rotates the oscillating weight.

Rotor

Transforms every movement of the oscillating weight into a magnetic charge.

Rechargeable Long-Life Battery

Stores the generated electrical energy.

Generating Electricity

The natural movement of your body is sensitively transformed into electrical energy.

Storing Electricity

A high performance long-life **rechargeable** battery stores the energy to power the watch.

Utilising Electricity

Advanced electronic circuitry ensures that the energy is converted with optimum efficiency into a quartz signal.

Circuit Block

Controls voltage and amperage. And by quartz oscillation, it produces a precise watch signal.

SEIKO SOLAR

No Battery Change Required

SEIKO. Solar watch experts since 1977

OPERATING INSTRUCTIONS

KINETIC (5M54/62/84)

- Hour, minute and second hands.
- Calendar (Date).
- Day indicator (5M54).
- Automatic Power Generator.
- Energy Depletion Forewarning.
- Overcharge Prevention Function.
- 6 Month Power Storage.

HOW TO START THE WATCH

When using the watch for the first time be sure to charge the Rechargeable Battery sufficiently by swinging the watch from side to side before setting the time and other functions.

1. Swing the watch side to side at a rate of twice per second.
2. After the watch is swung for approx. 2 to 3 minutes, and the second hand begins to move in one-second intervals there is about six hours of power available. It is not necessary to charge the rechargeable battery fully before you wear the watch. While the watch is on your arm, the Automatic Power Generator will ensure constant operation.

Notes: 1. To charge the rechargeable battery efficiently, swing the watch from side to side, making an arc of about 20cm. 2. No additional benefit is obtained by swinging the watch more quickly or with greater vigor. 3. When the watch is swung, the oscillating weight in the generating system rotates to drive the mechanism. As it rotates, it creates a sound: this is not a malfunction.

HOW TO SET TIME

The Seiko Kinetic series of watches are basic analogue and can be set the same as any 2 or 3 hand watch.

1. Pull out the crown to the second click.
2. Turn the crown to set hour and minute hands.
3. Push crown back to normal position.

Notes: 1. When setting the hour hand, check that AM/PM is correctly set. The watch is so designed that the calendar/day changes once in 24 hours. Turn the hands past the 12 o'clock marker to determine whether the watch is set for the AM or PM period. If the calendar/day changes, the time is set for the AM period. If the calendar/day does not change, the time is set for the PM period. 2. When setting the minute hand, advance it 4 to 5 minutes ahead of the desired time and then turn it back to the exact time.

POWER RESERVE INDICATOR

By pressing Button A once when the second hand is in 12 position the watch can indicate how much power is stored in the rechargeable battery.

If the second hand advances to the;

- 1 position the watch has between approximately 1 and 7 days.
- 2 position the watch has between 7 days and 1 month.
- 4 position the watch has between 1 and 4 months.
- 6 position the watch has between 4 and 6 months.

KINETIC GMT (5M85)

- Hour, minute, second, 24-hour hand.
- Calendar (Date).
- Automatic Power Generator.
- Energy Depletion Forewarning.
- Overcharge Prevention Function.
- 6 Month Power Storage.

HOW TO START THE WATCH

1. Swing the watch from side to side.
* Swing rhythmically at a rate of twice a second.
2. Charge the KINETIC E.S.U. sufficiently.
3. Set the time/calendar and put on the watch.

POWER RESERVE INDICATOR

1. Press the button at the 2 o'clock position.

To allow easy reading of the second hand, press the button when the second hand is at the 12 o'clock position.

| ★ QUICK MOVEMENT OF SECOND HAND | 5 seconds | 10 seconds | 20 seconds | 30 seconds |
|---------------------------------|----------------------|----------------------------|-----------------|--------------------------------|
| | | | | |
| POWER RESERVE | Between 1 and 7 days | Between 7 days and 1 month | Approx. 1 month | Approx. between 4 and 6 months |

★ The second hand will resume normal movement after the indicated 5, 10, 20 or 30 seconds have elapsed.

HOW TO SET TIME

When setting the time, ensure that the watch is working: the second hand is moving at one-second intervals.

- In a case that the watch is completely stopped due to a shortage of stored electrical energy, recharge the watch until the second hand resumes the normal one-second interval movement, and then reset the time and calendar.
- The 24-hour hand can be used in two ways. Since the time setting procedure differs according to the usage, please choose the method before setting the time.

Method 1

Simply using the 24-hour hand to show the 24-hour time as an AM/PM indicator.

- This is the standard usage for the 24-hour hand.

Method 2

Using the 24-hour hand to indicate the time in a different time zone.

- For instance, by setting the 24-hour hand to GMT while setting the hour and minute hands to indicate the time in your area, you can easily check GMT with the 24-hour hand at any time.

HOW TO SET THE 24-HOUR HAND AS A REGULAR 24-HOUR INDICATOR

<When method 1 usage is selected>

1. Pull out the crown to the second click.
2. Turn the crown to set the 24-hour and minute hands to the current time.
3. Push the crown back in simultaneously with a time signal.
4. Pull out the crown to the first click.
5. Turn the crown to set the hour hand to the current hour.
6. Push the crown back in upon completion of time setting.

HOW TO SET THE 24-HOUR HAND AS A REGULAR 24-HOUR INDICATOR

<When method 2 usage is selected>

1. Pull out the crown to the second click.
2. Turn the crown to set the 24-hour and minute hands to the time in the "different time zone area" you wish to set.
3. Push the crown back in simultaneously with a time signal.
4. Pull out the crown to the first click.
5. Turn the crown to set the hour hand to the current hour.
6. Push the crown back in upon completion of time setting.

HOW TO SET THE DATE

- This watch is designed so that the date changes one day by turning the hour hand two full rotations in the same way as in "the time difference adjustment function."
- The date advances one day by turning the hour hand two full rotations clockwise, while the date is set back one day by turning the hour hand two full rotations counterclockwise.
- After setting the time, it is necessary to set the date. Manual date adjustment is required on the first day after a month that has less than 31 days.

1. Pull out the crown to the first click.
2. Each time the hour hand makes two full rotations by turning the crown, the date is adjusted one day.
3. After completing the date setting, check the position of the hour hand once again and push the crown back in.

HOW TO ADJUST THE TIME DIFFERENCE

- While staying in a place in a different time zone area from where you live, you can conveniently set the watch to indicate the local time in the place where you are staying without stopping the watch.
 - The time difference adjustment function is interrelated with the date display. If the time difference is correctly adjusted, the watch displays the correct date of the place where you are staying.
1. Pull out the crown to the first click.
 2. Turn the crown to set the hour hand to indicate the time of the place where you are staying. The hour hand is independently set to the current hour.
 3. After completing the time difference adjustment, check the position of the hour hand once again and push the crown back in.

OPERATING INSTRUCTIONS

KINETIC DIRECT DRIVE (5D22)

- Time/Calendar.
- Hour, minute, second hands.
- Date.
- Direct Drive Indicator.
- Power reserve indicator.
- Real-time power indicator.
- Hand winding Capability.
- System reset.

❖ The position of the date window may differ depending on the model.

HOW TO CHARGE AND START THE WATCH

1. Turn the crown clockwise repeatedly to charge the watch.
2. As electric power is generated by the continues turning of the crown, the Direct Drive indicator hand will moves to point at scale marking 0 and the second hand will start moving.
3. Continue to turn the crown to sufficiently charge the watch.
 - The Direct Drive indicator hand will moves up and down to display the electric power generation status.
 - After charging the watch, the indicator hand will display the amount of power generated by the current manual winding for approximately 4 seconds, and then the hand returns to display the total amount of power reserve.
 - A fully charged watch will keep on operating for approximately 1 month.

HOW TO READ THE DIRECT DRIVE INDICATOR

The direct drive indicator can be used to check:

- Power reserve amount.
- Real-time power generation status and newly generated amount of power while charging the watch.

Power reserve indicator

- The watch checks power reserve in the rechargeable battery and display how long the watch will keep operating in 18 steps.
- If the indicator hands moves to the 0 position, the watch will stop operating within 3 hours. When the watch is stops, the indicator hand moves to the standby position to show that the watch stops operating due to power shortage.

Real-time power indicator

- When turning the crown to charge the watch, the watch checks the newly generated amount of power and display in 19 steps (0-“M+1” scale marking)
- A maximum 6 hours of generated power can be displayed.

HOW TO READ THE DIRECT DRIVE INDICATOR WHILE CHARGING THE WATCH

1. Turn the crown clockwise. After approximately 1 second, the direct drive indicator hands starts moving.
2. Continue to turn the crown. The indicator hand moves upward and downward according to the power generation status. The faster the crown is turned the more power it generates.
3. Stop turning the crown, the direct dive indicator will display the total amount of power generated. After approximately 4 second the direct drive indicator will display the total amount of power reserve.

HOW TO SET TIME

1. Pull the crown out to the second click. When the second hand is at the 12 o'clock position.
2. Turn the crown to set the time.
3. When finish setting the time push the crown back to normal position.

HOW TO SET THE DATE

1. Pull the crown out to the first click.
2. Turn the crown anticlockwise until the current date.

RESETTING THE BUILT-IN IC

When the watch stops operating even through it displays the remainder of the power reserve, follow the instruction below to reset the built-in IC.

1. Pull the crown out to the second click.
2. Press the reset button for 2 seconds or longer using a sharp-pointed tool.
3. Push the crown back into the normal position.
4. Turn the crown to charge the watch at least until the indicator hand points at the second marking above “0”. And then set the time, date, and day of the week.
 - After resetting the built-in IC, all the generated/reserve power will be lost.
 - The indicator hand will point at 0 position, and the watch resume its normal operation.

■ SCALE TABLE OF POWER RESERVE AMOUNT AND GENERATED POWER AMOUNT

| Scale marking | Standby position | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
|---------------------------|----------------------------|---|---------|---------|-----|-------------|-------------|------|-------------|-------------|-----|-------------|-------------|
| Indication on dial | | 0 | | | | 12 (12 h) | | | | D (Day) | | | |
| Power reserve amount | The watch stops operating. | 0 | 3 H | 6 H | 9 H | 12 H | 15 H | 18 H | 21 H | 1 D | 2 D | 3 D | 4 D |
| Amount of generated power | | 0 | 20 Min. | 40 Min. | 1 H | 1 H 20 Min. | 1 H 40 Min. | 2 H | 2 H 20 Min. | 2 H 40 Min. | 3 H | 3 H 20 Min. | 3 H 40 Min. |

| Scale marking | 12 | 13 | 14 | 15 | 16 | 17 | 18 |
|---------------------------|-----|-------------|-------------|-----|-------------|-------------|-----|
| Indication on dial | 0 | | W (Week) | | 12 | M (Month) | |
| Power reserve amount | 5 D | 6 D | 1 W | 2 W | 3 W | 30 D | |
| Amount of generated power | 4 H | 4 H 20 Min. | 4 H 40 Min. | 5 H | 5 H 20 Min. | 5 H 40 Min. | 6 H |

H : Hour
D : Day
W : Week
* The minimum amount of power reserve and generated power is described in the table.

AUTOMATIC HAND ALIGNMENT

The position of the indicator hand may move out of alignment in rare cases.

The watch automatically corrects the position of the indicator hand once every 24 hours. While correcting the hand position, the indicator hand may move abnormally, however, this is not a malfunction. After automatic hand alignment is performed, the indicator hand will return to display power reserve amount. When automatic hand alignment starts, the indicator hand moves to the area under the 0 position and vibrates, and then points at the 0 position. After automatic hand alignment is completed, the indicator hand returns to display power reserve amount.

KINETIC DIRECT DRIVE (5D44)

- Time/Calendar.
- Hour, minute, second hands.
- Date, retrograde day indicator.
- Direct Drive Indicator.
- Power reserve indicator.
- Real-time power indicator.
- Crown with Driving Wheel.
- Hand winding Capability.
- System reset.

❖ The position of the date window and day hand may differ depending on the model.

CROWN WITH DRIVING WHEEL

- ❖ Some models may have a crown with a special structure as illustrated below. Refer to the following instructions when operating this type of crown, as it should be operated in a different way from that of ordinary ones.

To pull out the crown, pull out the **A** portion (crown).
To turn the crown, turn the **B** portion (driving wheel).

HOW TO CHARGE AND START THE WATCH

1. Turn the crown clockwise repeatedly to charge the watch.
2. As electric power is generated by the continuous turning of the driving wheel, the Direct Drive indicator hand will move to point at scale marking 0 and the second hand will start moving.
3. Continue to turn the crown to sufficiently charge the watch.
 - The Direct Drive indicator hand will move up and down to display the electric power generation status.
 - After charging the watch, the indicator hand will display the amount of power generated by the current manual winding for approximately 4 seconds, and then the hand returns to display the total amount of power reserve.
 - A fully charged watch will keep on operating for approximately 1 month.

HOW TO READ THE DIRECT DRIVE INDICATOR

The direct drive indicator can be used to check:

- Power reserve amount.
- Real-time power generation status and newly generated amount of power while charging the watch.

Power reserve indicator

- The watch checks power reserve in the rechargeable battery and displays how long the watch will keep operating in 18 steps.
- If the indicator hand moves to the 0 position, the watch will stop operating within 3 hours. When the watch is stopped, the indicator hand moves to the standby position to show that the watch stops operating due to power shortage.

Real-time power indicator

- When turning the driving wheel to charge the watch, the watch checks the newly generated amount of power and displays in 19 steps (0-“M+1” scale marking).
- A maximum 6 hours of generated power can be displayed.

HOW TO READ THE DIRECT DRIVE INDICATOR WHILE CHARGING THE WATCH

1. Turn the crown clockwise. After approximately 1 second, the direct drive indicator hand starts moving.
2. Continue to turn the crown. The indicator hand moves upward and downward according to the power generation status. The faster the crown is turned, the more power it generates.

3. Stop turning the crown, the direct drive indicator will display the total amount of power generated. After approximately 4 seconds the direct drive indicator will display the total amount of power reserve.

HOW TO SET TIME

1. Pull the crown out to the second click. When the second hand is at the 12 o'clock position.
2. Turn the crown to set the time.
3. When finished setting the time, push the crown back to normal position.

HOW TO SET THE DATE AND DAY

1. Pull the crown out to the first click.
2. Turn the crown anticlockwise until the current date.
3. Turn the crown clockwise to set the day hand to point at the correct day of the week.
4. Push the crown back to the normal position.

RESETTING THE BUILT-IN IC

When the watch stops operating even though it displays the remainder of the power reserve, follow the instruction below to reset the built-in IC.

1. Pull the crown out to the second click.
2. Press the reset button for 2 seconds or longer using a sharp-pointed tool.
3. Push the crown back into the normal position.
4. Turn the driving wheel to charge the watch at least until the indicator hand points at the second marking above “0”. And then set the time, date, and day of the week.
 - After resetting the built-in IC, all the generated/reserve power will be lost.
 - The indicator hand will point at 0 position, and the watch resumes its normal operation.

AUTOMATIC HAND ALIGNMENT

The position of the indicator hand may move out of alignment in rare cases. The watch automatically corrects the position of the indicator hand once every 24 hours. While correcting the hand position, the indicator hand may move abnormally, however, this is not a malfunction. After automatic hand alignment is performed, the indicator hand will return to display power reserve amount. When automatic hand alignment starts, the indicator hand moves to the area under the 0 position and vibrates, and then points at the 0 position. After automatic hand alignment is completed, the indicator hand returns to display power reserve amount.

SCALE TABLE OF POWER RESERVE AMOUNT AND GENERATED POWER AMOUNT

| Scale marking | Standby position | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
|---------------------------|----------------------------|---|---------|---------|-----|-------------|-------------|------|-------------|-------------|------|-------------|-------------|
| Indication on dial | 0 | | | | | 12 (12 h) | | | | D (Day) | 1 D | 2 D | 3 D |
| Power reserve amount | The watch stops operating. | 0 | 3 H | 6 H | 9 H | 12 H | 15 H | 18 H | 21 H | 24 H | 27 H | 30 H | 33 H |
| Amount of generated power | | 0 | 20 Min. | 40 Min. | 1 H | 1 H 20 Min. | 1 H 40 Min. | 2 H | 2 H 20 Min. | 2 H 40 Min. | 3 H | 3 H 20 Min. | 3 H 40 Min. |

| Scale marking | 12 | 13 | 14 | 15 | 16 | 17 | 18 |
|---------------------------|-----|-------------|-------------|-----|-------------|-------------|-----|
| Indication on dial | 0 | | W (Week) | | 12 | M (Month) | |
| Power reserve amount | 5 D | 6 D | 1 W | 2 W | 3 W | 30 D | |
| Amount of generated power | 4 H | 4 H 20 Min. | 4 H 40 Min. | 5 H | 5 H 20 Min. | 5 H 40 Min. | 6 H |

H : Hour
D : Day
W : Week
* The minimum amount of power reserve and generated power is described in the table.

OPERATING INSTRUCTIONS

KINETIC PERPETUAL (7D46/7D48/7D56)

- Hour, minute and second hands.
- Calendar (Date).
- Automatic Power Generator.
- Automatic Energy Saving Function.
- Time Relay Function.
- Perpetual Calendar.
- Energy Depletion Forewarning Function.
- Overcharge Prevention Function.
- 4 Year Power Storage.

HOW TO START THE WATCH

When using the watch for the first time be sure to charge the Rechargeable Battery sufficiently by swinging the watch from side to side before setting the time and other functions.

1. Swing the watch side to side at a rate of twice per second.
2. After the watch is swung for approximately 500 times, the second hand begins to move in 1 second intervals. A further 200 swings will ensure about 1 day of power available. It is not necessary to charge the rechargeable battery fully before you wear the watch. While the watch is on your arm, the Automatic Power Generator will ensure constant operation.

Note: 1. Wearing the watch continuously for 12 hours will accumulate power to run the watch for approximately one and a half additional days. As a general guideline, if you wear the watch everyday for 12 hours over a period of a week, the power to run the watch for approximately 10 days will be additionally secured. If the watch enters the power save mode, this amount of energy will keep the watch running for approximately one month and a half. 2. No additional benefit is obtained by swinging the watch more quickly or with greater vigor. 3. When the watch is swung, the oscillating weight in the generating system rotates to drive the mechanism. As it rotates, it creates a sound: this is not a malfunction.

AUTOMATIC POWER SAVE FUNCTION

In order to conserve the stored electrical energy, the watch automatically enters Power Save Mode to stop the hands from moving approximately 24 hours after the watch is left untouched. In a case that the fully charged watch enters the power save mode, the Time Relay Function of the watch remains operable for approximately 4 years.

PERPETUAL CALENDAR FUNCTION

Once set, the calendar automatically adjusts for odd and even months including February of leap years until the year 2100. While the watch is in power save mode, the perpetual calendar continues to function (the calendar continues to properly advance).

ENERGY DEPLETION FOREWARNING FUNCTION

When the second hand starts moving in two-second intervals instead of the normal one-second interval, the watch will run down in approximately 12 hours. If the power save function has been turned off by swinging the watch, and the second hand starts to move in two-second intervals, then the power reserve may have been drained to an extremely low level. In either case, charge the watch using the procedure above.

HOW TO SET TIME AND DATE

Because the calendar is pre-adjusted at the factory, you may only need to set the time and date. Pull out the crown out to the second click. The second hand will stop on the spot. Turn the crown to set the time. Remember to check the 24 hour indicator to correctly set AM or PM. To set the time accurately, advance the minute hand 4 to 5 minutes ahead of the correct time, and then turn it back to the exact time.

To adjust the date pull the crown out to the first click. Rotate crown in either way to adjust to the correct date.

Note: Do not pull the crown out to adjust the date/time until the Time Relay Function is complete. This will cause the time data retained inside the watch to be erased, thus disabling the Time Relay Function.

HOW TO DO A COMPLETE CALENDAR ADJUSTMENT

Complete calendar adjustment is only necessary if the watch is completely stopped due to shortage of stored energy. Each calendar item should be adjusted in sequence of year, month and date.

1. Pull out crown to first click.
2. Rotate crown to advance date and month until the correct year is displayed.
Refer to the Leap Year Chart to determine if the current year is a leap year or to determine if it is 1, 2 or 3 years past the last leap year.
3. After setting the watch to the correct year, continue to rotate the crown to set the correct month and then the correct date.
4. Pull crown out to second click to set the correct time
(see How To Set Time And Date).
5. Push crown back to original position.

Note: The date, month and year indicators work independently from the hands of the watch. Advancing the hands will not advance the date, month or year.

CHRONOGRAPH (6T63)

- Hour, Minute, seconds hand
- 24 hour hand
- Calendar
- Stopwatch measures 60 minutes in 1/5th of a second increments.

HOW TO START THE WATCH

- Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
- Turn crown counter clockwise until the previous day's date appears.
- Pull crown out to second click position.
- Turn counter clockwise to advance the hour and minute hands past 12am. Doing so will advance the date to the current date.
- Set hour and minute hands to desired time. Ensure you consider AM/PM period.
- Push crown back in completely. (Ensure you screw crown back in if fitted with this feature).

HOW TO USE STOPWATCH

- The stopwatch can measure up to 60 minutes in 1/5th of a second increments.
- Press Button 'A' to start/stop/restart the stopwatch.
- Press Button 'B' to split/split release/reset the stopwatch.
- Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

OPERATING INSTRUCTIONS

CHRONOGRAPH (7T04)

- Hour, minute and small second hands.
- Calendar (Date).
- Stopwatch minute, and 1/5th second hands.
- Stopwatch measures up to 60 minutes in 1/5th of a second increments.
- 24 hour hand

HOW TO SET TIME AND DATE

- Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
- Turn crown counter clockwise until the previous day's date appears.
- Pull crown out to second click position.
- Turn counter clockwise to advance the hour and minute hands past 12am. Doing so will advance the date to the current date.
- Set hour and minute hands to desired time. Ensure you consider AM/PM period.
- Push crown back in completely. (Ensure you screw crown back in if fitted with this feature).

HOW TO USE STOPWATCH

- The stopwatch can measure up to 60 minutes in 1/5th of a second increments.
- Press Button 'A' to start/stop/restart the stopwatch.
- Press Button 'B' to split/split release/reset the stopwatch.
- Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

CHRONOGRAPH (7T11)

- Hour, Minute, seconds hand
- 24 hour hand
- Calendar
- Stopwatch measures 12 hours 1 second increments.

HOW TO SET TIME AND DATE

- Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
- Turn crown counter clockwise until the previous day's date appears.
- Pull crown out to second click position.
- Turn counter clockwise to advance the hour and minute hands past 12am. Doing so will advance the date to the current date.
- Set hour and minute hands to desired time. Ensure you consider AM/PM period.
- Push crown back in completely. (Ensure you screw crown back in if fitted with this feature).

HOW TO USE STOPWATCH

- The stopwatch can measure up to 60 minutes in 1/5th of a second increments.
- Press Button 'A' to start/stop/restart the stopwatch.
- Press Button 'B' to split/split release/reset the stopwatch.
- Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

OPERATING INSTRUCTIONS

ALARM CHRONOGRAPH (7T62)

- Hour, minute and small second hands.
- Calendar (Date).
- Stopwatch minute and 1/5th second hands.
- Stopwatch measures up to 60 minutes in 1/5th of a second increments.
- Alarm can be set on a 12 hour basis, or, can be used as a second time zone.

HOW TO SET TIME AND DATE

1. Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
2. Turn crown counter clockwise until the previous day's date appears.
3. Pull crown out to second click position.
4. Turn counter clockwise to advance the hour and minute hands past 12am. Doing so will advance the date to the current date.
5. Set hour and minute hands to desired time. Ensure you consider AM/PM period.
6. Push crown back in completely. (Ensure you screw crown back in if fitted with this feature.)

HOW TO SET ALARM TIME

1. Pull the crown out to the second click position.
2. Press 'B' to set the alarm hour and minute hands to the correct time.
3. Push the crown back to the normal position. Once the time is set, you do not have to adjust again unless there is a change in time (e.g. daylight savings).
4. For a dual time zone adjust hands on any desired time.

HOW TO SET ALARM

1. Pull the crown to the first click position.
2. Press button 'B' to set the alarm hour and minute hands to desired alarm time.
3. Push the crown back to the normal position.

Note: Alarm setting on a 12 hour basis only. Alarm will ring at the designated time for 20 seconds; one time only alarm. The alarm needs to be reset in order to re-engage the alarm function.

HOW TO USE STOPWATCH

The stopwatch can measure up to 60 minutes in 1/5th of a second increments.
Press Button 'A' to start, stop and restart the stopwatch.

- Press Button 'A' to start/stop/restart the stopwatch.
 - Press Button 'B' to split/split release/reset the stopwatch.
- * Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

HOW TO ADJUST HAND POSITION

1. If chronograph hands will not return the 12 o'clock position when the chronograph is reset or when the battery is replaced with a new one, follow the procedure below to reset the hands to the correct position.
2. Pull crown out to the second click.
- Press and hold button 'A'. The stopwatch minute hand will sweep around dial. Press button 'B' to adjust minute hand.
- Press and hold button 'A'. The stopwatch 1/5th of a second hand will sweep around dial. Press button 'B' to adjust 1/5th of a second hand.
3. Push crown back into normal position.

Note: Holding in button 'B' when adjusting the hand position, hands will move faster.

HOW TO USE ALARM DIAL AS DUAL TIME DISPLAY

1. Pull the crown out to the second click position.
2. Press the button "B" to set the hour and minute hands to time of a different time zone.
3. Push the crown back to normal position.

YACHTING TIMER (7T84)

- Time/Calendar.
- Hour, minute and small second hands.
- Date.
- Yacht Timer.
- 5, 6 & 10 minutes preset timers.
- Timer (TMR).
- Can be set to a maximum of 15 minutes in 1-minute increments.
- Stopwatch (CHR).
- Measure up to 12 hours in 1/5 second increments.
- Stopwatch will stop automatically when the measurement reaches 12 hours.
- Alarm (ALM).
- Single time alarm: sounds only once at a designated alarm time within 12 hours.
- Regular alarm: set to sound at a designated time everyday on a 12-hour basis.
- Local Time (LOC).
- A different time zone can be shown in 1-minute increments.

HOW TO CHANGE THE MODE

1. Pull the crown out to the first click.
2. Press button A to set the mode indicator pointing at your desired mode.
3. After selecting the desired mode, push the crown back to normal position.

HOW TO SET TIME ON MAIN DIAL AND SMALL DIAL

1. Pull the crown out to the second click, when the small second hand is at the 12 o'clock position.
2. Turn the crown to set the time of the main dial.
3. Press button B, to set the time for the small dial. With each press of button B the small watch hands will advance 1 minute. Pressing and holding button B will advance the small dial hands rapidly.
4. When finished setting the time, push the crown back to the normal position.

HOW TO SET THE DATE

1. Pull the crown out to the first click.
2. Turn the crown clockwise to set the date. (When setting the date, do not press either button A or B, as pressing either button while the crown is at the first click position can change the mode and the setting in some modes).
3. Push the crown back to the normal position.

HOW TO USE YACHTING TIMER

Yachting timer combines the function of a count down timer and a stopwatch that starts operating automatically when the timer finishes counting down. This function is particularly useful in yacht racing.

- Three pre-set yachting timer modes: 5, 6 and 10 minutes timers.
- Once you activate the yachting timer function, the selected timer will start counting down in 1 second increments.
- The remaining time will be indicated by the centre hand and the small dial will turn clockwise while the yachting time is counting down.
- When the yacht timer count down finishes, the watch will beep indicating time is up and the stopwatch will automatically start.
- The stopwatch can measure up to 12 hours in 1 second increments. When the measurement reaches 12 hours, the stopwatch will stop automatically.
- Only one yacht timer can be used at one time.
- Cannot change the selected timer while it is working. To change the timer, it is necessary to stop the current working timer before changing to another.
- Split time measurement is possible.

1. Pull the crown out to the first click.
2. Press button A, to set the mode indicator to point at the desired yacht timer.
3. Push the crown back to the normal position.
4. Press button A to start the yacht timer.
5. To reset the timer, press button A to stop the timer and press button B to reset.

The centre hand indicates the remaining minutes and the big hand of the small dial indicates the remaining seconds. When the remaining time is shorter than 60 seconds, the center hand also begins to countdown in 1 second increments.

Example: Timer mode display when the timer is set for 4 minutes

- * If you press button B once again after the timer time is set for 15 minutes, the timer time returns to one minute.
- * The set timer time will be retained even if the TIMER mode is changed to another mode.

HOW TO RESET THE YACHT TIMER

To reset the yacht timer, the stopwatch needs to be stopped.

When the stopwatch hands are moving:

1. Press button A to stop the stopwatch.
2. Press button B to reset the yacht timer.

When the stopwatch hands stopped:

1. Press button B to reset the yacht timer.

When the split time measurement is displayed while the stopwatch is measuring.

1. Press button B to release the stopwatch hands. The stopwatch hands return to the ongoing measurement movement.
2. Press button A to stop the stopwatch.
3. Press button B to reset the yacht timer.

When the split time measurement is displayed and the stopwatch is stopped.

1. Press button B to release the stopwatch hands. The stopwatch hands will stop.
2. Press button B to reset the yacht timer.

RESTART SETTING FUNCTION

- Yachting timer mode features a restart setting function, which enable to restart the measurement correctly and easily after an interruption during the stopwatch measurement.
- The restart setting function can be used anytime while the stopwatch is measuring following the yacht timer counting.
- Press button A for approximately 2 seconds will activate the restart setting function.
- Restart of the measurement will be made at regular intervals from the initial start of the measurement.
- The intervals between the initial start of the measurement and the restarts are automatically decided according to the selected yacht timer which had finished its counting before the stopwatch had started.

HOW TO USE THE TIMER

- The timer can set to a maximum of 15 minutes in 1 minute increments.
- The remaining time is indicated by the center hand and the two hands of the small watch.
- When the timer finishes counting down, the watch will beep indicating the time is up.

To set the Timer:

1. Pull the crown out to the first click.
2. Press button A to set the mode indicator pointing at the Timer mode.
3. Press button B to set the center hand to show the desired timer time. With each press of button B, the center hand moves one minute forward, adding one minute to the timer time.
4. Push the crown back to normal position.
- The number on the outer circle of the dial indicated by the centre hand shows the timer time. (The small hand of the small dial also indicates the timer time.)
5. Press Button A to start the timer, press button A to stop and press button B to reset.

HOW TO USE THE STOPWATCH

- The stopwatch can measure up to 12 hours in 1/5 second increments.
- The large second hand measures 1/5 second, the large hand in the small watch measures the minutes and the small hand measures the hour.
- When the measurement reaches 12 hours, the stopwatch will automatically stop.
- Split time measurement.

OPERATING INSTRUCTIONS

YACHTING TIMER (7T84) CONTINUED

1. Pull the crown out to the first click.
2. Press button A to set the mode indicator pointing at the chronograph mode.
3. Push the crown back to its normal position.
4. Press button A to start the stopwatch.
5. Press button A to stop the stopwatch.
6. Press button B to reset the stopwatch.
7. To accumulate elapsed time measurement, press button A to start and press button A to stop, press button A to restart the stopwatch and press button A to stop. Press button B to reset.
8. Split time measurement, press button A to start, press button B to split. Press button B for split release, press button A to stop and press button B again to reset. (Measurement and release of the split times can be repeated as many times as required by pressing button B).
9. Measurement of 2 competitors. Press button A and press button B for the finish time of the 1st competitor, press button A when 2nd competitor finishes. Then press button B for the finish time for 2nd competitor and press button B to reset.

HOW TO SET THE ALARM

Single time alarm

- Single time alarm is set in the Time mode.
 - The alarm will only alert once at a designated time and it is automatically disengaged.
 - The alarm time can be set within 12 hours from the current time in 1 minute increments.
1. Pull the crown out to the first click.
 2. Press button A to set the mode indicator to point at the Time mode.
 3. Press button B to set the alarm, which will show in the small watch. By press button B the small watch hands will advance in 1 minute.
 4. Push the crown to its normal position.
 5. To stop the alarm alert, press either button A or B. The single time alarm will go for 20 seconds.

The single time alarm will only work when it is in Time mode.

To cancel the single time alarm

- Press button B to set the alarm time to current time
- Change the Time mode to another mode.

Regular alarm

- The regular alarm can be set to be alert at a designated time everyday.
 - The regular alarm is set in the Alarm mode.
 - The set alarm time can be used as many times as required.
1. Pull the crown to the first click.
 2. Press button A to set the mode indicator to point at Alarm mode.
 3. Press button B to set the small dial to show the desired regular alarm time.
 4. Push the crown back to the normal position.
 5. To stop the alarm alert, press either button A or B. The regular alarm will go for 20 seconds.

Sound demonstration function (Alarm sound preview)

1. Pull the crown out to first click.
2. Press button A to set the mode indicator pointing at the alarm mode.
3. Push the crown back to the normal position.
4. Press button A for more than 2 seconds. The alarm sound can be heard while button A is kept pressed.

LOCAL TIME

- The small dial can be set to show the time in second time zone.
- Two different times can be shown at the same time using the main dial and the small dial as a dual time display.

HOW TO SET THE LOCAL TIME

1. Pull the crown out to first click.
2. Press button A to set the mode indicator to point at Local time mode.
3. Press button B to set the local time. (The small watch shows the time in another time zone.)
4. Push the crown back to normal position.

NECESSARY PROCEDURE AFTER BATTERY CHANGE

After the battery is replaced with a new one, or when an abnormal display appears, reset the watch build-in IC. The watch will resume its normal operation.

HOW TO RESET THE IC

1. Pull the crown out to the second click.
2. Press button A and B at the same time.
3. Push the crown back to the normal position and check if the hands move as normal.

HAND POSITION ADJUSTMENT

- Hand position adjustment is required when the hands are not correctly aligned for the use in the Stopwatch and Timer functions, or after a battery change or reset of the built-in IC.
1. Pull the crown out to second click.
 2. To adjust the small watch. Press button A for approximately 5 seconds. The small watch hands will start moving.
 3. Press button B to set the small watch hands to 12 o'clock, which is the initial position of the small watch hands.
 4. To adjust the center hand. Press button A the center hand will turn a full circle.
 5. Press button B to set the center hand to the 0 position.
 6. To adjust the mode indicator. Press button A the mode indicator will turn a full circle.
 7. Press button B to set the mode indicator pointing at the Time mode, which is the initial position of the mode indicator. Keep pressing the button B until the mode indicator exactly pointing at the dot marker.
 8. When adjustment is finish, push the crown back to normal position.
 9. After hand adjustment is complete, set the time and date following the instruction on how to set the time.

CHRONOGRAPH PERPETUAL (7T86)

- Time.
- Day/Date indicator.
- Month/Year check on demand.
- Stopwatch measures 24 hours in 1/5th of a second increments.
- Alarm – 24 hour.
- Perpetual Calendar automatically adjusts until Feb 2100.

HOW TO CHANGE MODE

Press Button B to change mode from 'Calendar/Alarm Mode' to 'Stopwatch Mode'.

HOW TO SET TIME AND ALARM DIAL TIME

- 1) Pull crown out to 2nd click when the small second hand is at the 60 second mark. The small second hand will stop immediately.
- 2) Turn the crown to set the main dial time.
- 3) Press button B to set the alarm sub-dial time in 24 hour format. E.g 6pm is 18:00.

HOW TO ADJUST PERPETUAL CALENDAR

- 1) Pull crown out to 1st Click.
- 2) Press button A for 5 seconds – the calendar hand will sweep around the dial.
- 3) Press B to set the date (hand will move quickly if kept pressed).
- 4) Press A once and the day indicator will point to CHR.
- 5) Press B to adjust the day of the week.
- 6) Press A and the calendar hand will point to the month.
- 7) Press B to adjust the month.
- 8) Press A and the calendar hand will point to the leap year indicators.
- 9) Press B to set the year (you must know the number of years elapsed since last leap year).
- 10) Press A to return to Date setting mode.
- 11) Press the crown back to the normal position.

HOW TO USE THE STOPWATCH

- 1) In the normal crown model Press B, and the Day/Mode hand will point to CHR.
- 2) Press Button A to start and stop the stopwatch.
- 3) Press Button B to reset the stopwatch.
- 4) To perform split/lap times Press button B while the stopwatch is running, then B to release the hands to continue with timing.

HOW TO USE THE ALARM

Ensure you have set the time of the alarm dial under the 'HOW TO SET TIME & ALARM DIAL'.

- 1) Pull crown out to first click.
- 2) Press Button B set desired alarm time (keeping button B pressed will make the hands move faster) This dial is a 24 hour dial, so 6pm is 18:00.
- 3) After desired time has been set press the crown back to the normal position. Alarm will sound for 20 seconds at desired time. To turn off alarm press Button A or B. To cancel an alarm set, pull crown out to first click and then press crown back to normal position.

OPERATING INSTRUCTIONS

CHRONOGRAPH (7T92)

- Hour, minute and small second hands. Calendar (Date).
- Stopwatch hour, minute, second and 1/20th second hands.
- Stopwatch measures up to 12 hours in 1/20th of a second increments.

HOW TO SET TIME AND DATE

1. Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
2. Turn crown counter clockwise until the previous day's date appears.
3. Pull crown out to second click position.
4. Turn counter clockwise to advance the hour and minute hands past 12am.
Doing so will advance the date to the current date.
5. Set hour and minute hands to desired time. Ensure you consider AM/PM period.
6. Push crown back in completely. (Ensure you screw crown back in if fitted with this feature.)

HOW TO USE STOPWATCH

- The stopwatch can measure up to 12 hours in 1/20th of a second increments.
- Press Button 'A' to start/stop/restart the stopwatch.
 - Press Button 'B' to split/split release/reset the stopwatch.
- * Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

SOLAR ALARM CHRONOGRAPH (V172)

- Time/calendar.
- 60-Minute stopwatch in 1/5-second increments with split time measurement function.
- Single-time alarm within 12 hours.
- Powered by light energy.
- No battery change required.
- Lasts for 6 months after full charge.
- Energy depletion forewarning function.
- Overcharging prevention function.

MAKING ADJUSTMENTS TO THE WATCH

This watch is designed so that the following adjustments are made with the crown at the second click position:

1. main time setting
2. alarm hand adjustment
3. stopwatch hand position adjustment

Once the crown is pulled out to the second click, be sure to check and adjust 1. and 2. at the same time. If needed, 3. should also be adjusted then.

HOW TO SET TIME

1. Pull out crown to the second click when the second hand is at the 12 o'clock position.
2. Turn the crown to set the hour and minute hands.

HOW TO ADJUST THE ALARM HANDS

2. Press 'B' repeatedly to set the ALARM hands to the time indicated by the main time hands.

HOW TO ADJUST STOPWATCH HAND POSITION

If the STOPWATCH hands are not in the "0" position, follow the procedure below to set them to the "0" position.

1. Press 'A' for 2 seconds.
2. Press 'B' repeatedly to set the STOPWATCH minute hand to the "0" position.
3. Press 'A' for 2 seconds.
4. Press 'B' repeatedly to set the STOPWATCH 1/5-second hand to the "0" position.

HOW TO SET DATE

Before setting the date, be sure to set the main time.

1. Pull the crown out to the first click.
2. Turn the crown clockwise until the desired date appears.
3. Push the crown back into the normal position.

HOW TO USE STOPWATCH

The stopwatch can measure up to 60 minutes in 1/5-second increments. When the measurement reaches 60 minutes, the stopwatch automatically stops.

Split time measurement is available.

Before using the stopwatch, be sure to check that the crown is set at the normal position and that the STOPWATCH hands are reset to the "0" position.

HOW TO RESET STOPWATCH

While the stopwatch hands are moving:

1. Press Button 'A' to stop the stopwatch.
2. Press Button 'B' to reset the stopwatch.

When the stopwatch is stopped:

1. Press Button 'B' to reset the stopwatch.

When the split time measurement is displayed while the stopwatch is measuring:

1. Press Button 'B' to release the split time display. The stopwatch hands move quickly, and then indicate the measurement in progress.

2. Press Button 'A' to stop the stopwatch.
3. Press Button 'B' to reset the stopwatch.

When the split time measurement is displayed and the stopwatch is stopped:

1. Press Button 'B' to release the split time display. The stopwatch hands move quickly, and then stop.
2. Press Button 'B' to reset the stopwatch.

HOW TO SET ALARM

The alarm can be set to ring only once at a designated time within the coming 12 hours.

- The alarm time can be set in one minute increments.
- You can preview the alarm sound by using the sound demonstration function.

Before using the alarm, check that the ALARM hands are adjusted to the current time.

1. Pull the crown out to the first click.
2. Press 'B' repeatedly to set the desired alarm time.
3. Push the crown back into the normal position.

At the designated time the alarm rings for 20 seconds, and it is automatically disengaged as it stops. To stop it manually, press Button A or B.

HOW TO CHARGE AND START THE WATCH

When you start the watch or when the energy in the rechargeable battery is reduced to an extremely low level, charge it sufficiently by exposing the watch to light.

1. Expose the watch to sunlight or strong artificial light.
2. Keep the watch exposed to the light until the second hand moves at 1-second intervals.
3. When the watch is charged after it has completely stopped, set the date and time before wearing the watch.

GUIDELINE OF CHARGING TIME/ACCURACY

| Environment/Lightsource (lux) | V172 | | |
|---|---|-----------|-----------|
| | A (minutes) | B (hours) | C (hours) |
| General offices/ Fluorescent light (700) | 150 | 60 | - |
| 30W20cm/ Fluorescent light (3000) | 33 | 13 | 110 |
| Cloudy weather/Sunlight (10000) | 9 | 3.5 | 30 |
| Fair weather/Sunlight (100000) | 2 | 0.6 | 5 |
| Expected life per charge from full charge to stoppage | 6 months | | |
| Loss/gain (monthly rate) | Less than 15 seconds when the watch is worn on your wrist at a normal temperature range (5 °C to 35 °C) | | |
| Operational temperature range | -10 °C to 60 °C | | |

A: Time to charge 1 day of power
B: Time required for steady operation
C: Time required for full charge

The above table provides only a general guideline.

OPERATING INSTRUCTIONS

SOLAR CHRONOGRAPH (V175)

- Time/calendar
- 60-Minute stopwatch in 1/5-second increments with split time
- Measurement function
- Powered by light energy
- No battery change required
- Lasts for 6 months after full charge
- Energy depletion forewarning function
- Overcharging prevention function

HOW TO SET TIME AND DATE

- Pull crown out to the first click position (unscrew crown if your watch is fitted with this feature).
- Turn crown counter clockwise until the previous day's date appears.
- Pull crown out to second click position.
- Turn counter clockwise to advance the hour and minute hands past 12am. Doing so will advance the date to the current date.
- Set hour and minute hands to desired time. Ensure you consider AM/PM period.
- Push crown back in completely. (Ensure you screw crown back in if fitted with this feature).

HOW TO USE STOPWATCH

- The stopwatch can measure up to 60 minutes in 1/5th of a second increments.
- Press Button 'A' to start/stop/restart the stopwatch.
- Press Button 'B' to split/split release/reset the stopwatch.
- Do not press Buttons 'A' and 'B' at the same time, or press one of the two buttons while keeping the other pressed.

| Environment/Lightsource (lux) | V175 | | |
|---|---|-----------|-----------|
| | A (minutes) | B (hours) | C (hours) |
| General offices/ Fluorescent light (700) | 150 | 60 | - |
| 30W20cm/ Fluorescent light (3000) | 33 | 13 | 110 |
| Cloudy weather/Sunlight (10000) | 9 | 3.5 | 30 |
| Fair weather/Sunlight (100000) | 2 | 0.6 | 5 |
| Expected life per charge from full charge to stoppage | 6 months | | |
| Loss/gain (monthly rate) | Less than 15 seconds when the watch is worn on your wrist at a normal temperature range (5 °C to 35 °C) | | |
| Operational temperature range | -10 °C to 60 °C | | |

A: Time to charge 1 day of power
B: Time required for steady operation
C: Time required for full charge

❖ The above table provides only a general guideline.

GUIDELINE OF CHARGING TIME/ACCURACY

The watch operates while charging electricity by converting light received on the dial to electrical energy. It cannot properly operate unless the remaining energy is sufficient. Place or store the watch in a location receiving light etc., to sufficiently charge electricity.

- When the watch is stopped or the second hand starts moving at 2-second intervals, charge the watch by exposing it to light.
- The time required for charging the watch varies depending on the calibres. Check the calibre of your watch engraved on the back cover.
- It is recommended that the watch be charged for as long as the charging time "B" to assure the stable movement of the watch.

ENERGY DEPLETION FOREWARNING FUNCTION

- When the energy stored in the rechargeable battery is reduced to an extremely low level, the second hand starts moving at 2-second intervals instead of the normal 1-second intervals. The watch remains accurate even while the second hand is moving at 2-second intervals.
- While the second hand is moving at 2-second intervals, the stopwatch cannot be activated.
- If the second hand starts to move at 2-second intervals while the stopwatch is operating, the stopwatch will be automatically stopped and the stopwatch hands will return to the "0" position.
- When this occurs, recharge the watch as soon as possible by exposing it to light. Otherwise, the watch may stop operating in a few days.

TO PREVENT THE ENERGY DEPLETION

- When wearing the watch, make sure that the watch is not covered by clothing.
- When the watch is not in use, leave it in a bright place as long as possible.

NOTE ON POWER SUPPLY

- The battery used in this watch is a rechargeable battery, which is different from ordinary silver oxide batteries. Unlike other disposable batteries such as dry-cell batteries or button cells, this rechargeable battery can be used over and over again by repeating the cycles of discharging and recharging.
- The capacity or recharging efficiency of the rechargeable battery may gradually deteriorate for various reasons such as long-term use or usage conditions. Worn or contaminated mechanical parts or degraded oils may also shorten recharging cycles. If the efficiency of the rechargeable battery decreases, it will be necessary to have the watch repaired.

CAUTION

- Do not remove the rechargeable battery yourself. Replacement of the rechargeable battery requires professional knowledge and skill. Please ask a watch retailer for replacement of the rechargeable battery.
- Installation of an ordinary silver oxide battery can generate heat that can cause bursting and ignition.

SOLAR ANALOGUE

- Powered by light energy.
- No battery change required.
- Lasts for 2 to 12 months after full charge (depends on the calibre).
- Energy depletion forewarning function (for cal. V111, V117, V145, V147, V157, V158, V181, V182, V187 only).
- Instant-start function (for cal. V145, V147, V157, V158, V181, V182, V187 only).
- Overcharging prevention function.

HOW TO CHARGE AND START THE WATCH

When you start the watch or when the energy in the rechargeable battery is reduced to an extremely low level, charge it sufficiently by exposing the watch to light.

1. Expose the watch to sunlight or strong artificial light.
2. Keep the watch exposed to the light until the second hand moves at 1-second intervals.
3. When the watch is charged after it has completely stopped, set the date and time before wearing the watch.

HOW TO SET TIME AND DATE

Models with two/three hands:

1. Pull out the crown to the first click.
2. Turn the crown to set the desired time.
3. Push back the crown completely (in accordance with a time signal for a three-hand model.)

Models with date:

1. Pull out the crown to the first click and set the previous date.
2. Pull out the crown to the second click when the second hand is at the 12 o'clock position.
3. Turn the crown until the desired date appears.
4. Turn the crown to set the hour and minute hands to the desired time.
5. Push back the crown completely in accordance with a time signal.

Models with day and date:

1. Pull out the crown to the first click and set the previous day and date.
2. Pull out the crown to the second click when the second hand is at the 12 o'clock position.
3. Turn the crown until the desired day and date appears.
4. Turn the crown to set the hour and minute hands to the desired time.
5. Push back the crown completely in accordance with a time signal.

GUIDELINE OF CHARGING TIME/ACCURACY

| Environment/Lightsources (lux) | V110 | | | V111/V117 | | |
|---|---|-----------|-----------|---|-----------|-----------|
| | A (minutes) | B (hours) | C (hours) | A (minutes) | B (hours) | C (hours) |

| Less than 20 seconds when the watch is worn on your wrist at a normal temperature range (5 °C to 35 °C) | | | | | |
| -5 °C to 50 °C | | | | | |

- A:** Time to charge 1 day of power
B: Time required for steady operation
C: Time required for full charge

The above table provides only a general guideline.

ENERGY DEPLETION FOREWARNING FUNCTION

- If your watch has a second hand, when the energy stored in the rechargeable battery is reduced to an extremely low level, the second hand starts moving at 2-second intervals instead of the normal 1-second intervals. (Some calibres have no such function.) The watch remains accurate even while the second hand is moving at 2-second intervals.
- In that case, recharge the watch as soon as possible by exposing it to light. Otherwise, the watch may stop operating in about 3 days. (For recharging the watch, see "HOW TO CHARGE AND START THE WATCH")

To prevent the energy depletion:

- When wearing the watch, make sure that the watch is not covered by clothing.
- When the watch is not in use, leave it in a bright place as long as possible.

OPERATING INSTRUCTIONS

PERPETUAL CALENDAR (6A32)

- Hour, minute and second hands.
- Calendar (Date).
- Once set, the calendar automatically adjusts for odd and even months including February of leap years up to February 28th 2100.
- Can indicate the year, month and date.

BEFORE USING THE WATCH

Because the calendar is pre-adjusted at the factory, you only need to set the time and date and the calendar will automatically update itself. *Before using the watch, set the time and date.

HOW TO SET TIME AND DATE

1. Pull out the crown out to the second click when the second hand is at the 12 o'clock position.
 2. Turn the crown in either direction to set the time and date.
 3. Push the crown back completely when set to desired time.
- Follow the procedures below to check the calendar and, if necessary, to adjust it.
- Do not check and adjust the calendar between 11pm and 1am. If the calendar is checked and adjusted between these times, the date may not change properly. In such case, first change the time to any time outside this period, and then set the date. After that, move the hands back to the correct time.
 - If the crown is pulled out to the second click while the numeral in the calendar frame is advancing or moving back, the second hand may be misaligned from the 12 o'clock position (initial position).
 - The button and crown operation cannot be made while the numeral in the calendar frame is advancing or moving back. Press the button or turn the crown after then numeral stops.
 - If the watch is left untouched for more than 2 to 3 minutes while checking or adjusting the calendar, the watch will resume normal movement. In such a case, start again from the beginning of the procedures.

- Do not leave the crown at the first or second click when you use the watch, as this will shorten the battery life.

BATTERY LIFE INDICATOR

When the second hand starts moving at two-second intervals instead of the normal one-second interval, replace the battery with a new one as soon as possible. Otherwise, the watch will stop operating in a couple of days. Time accuracy is not affected even if the hands are moving at two-second intervals. While the second hand is moving at two-second intervals, the date will not change. This is not a malfunction.

CHECKING AND ADJUSTMENT OF THE CALENDAR AFTER BATTERY CHANGE

After the battery is replaced, be sure to check that the calendar is correct. If the watch does not indicate the year, month and date correctly adjust the calendar (see 'How To Check And Adjust The Calendar').

HOW TO CHECK AND ADJUST CALENDAR

1) Pull crown out to first click.

2) Zero Matching. The second hand moves to the initially set zero position which should be exactly at the 12 o'clock. If not, adjust it by turning the crown. Then press the button. The calendar disk also moves to the initially set zero position within this stage.

3) Zero Matching the Calendar Disk. The calendar disk swings to the initially set zero position which is '1'. If not, adjust it by turning the crown. Then press the button.

4) Adjusting the Date. The second hand moves to 9 o'clock position to show that you are now adjusting the date. The calendar disk moves to the initially set current date. Adjust it, if necessary, by turning the crown. Then press the button.

5) Adjusting the Month. The second hand moves to 10 o'clock position to show that you are now adjusting the month. The calendar disk moves to the initially set current month. Adjust it, if necessary, by turning the crown. Then press the button.

6) Adjusting the Year. The second hand moves to 11 o'clock position to show that you are now adjusting the year. The calendar disk moves to the initially set current year. Adjust it, if necessary, by turning the crown. Then press the button. The calendar displays the last 2 digits of the Christian Era until 2032, it will display 4). Refer year table, then press the button.

7) Completing the Adjustment. The calendar adjustment is completed by pushing the crown back to the normal position.

YEAR TABLE

| LAST 1 OR 2 DIGITS OF THE YEAR | NUMBER OF YEARS SINCE THE LAST LEAP YEAR | YEAR | YEAR | YEAR | YEAR |
|-----------------------------------|--|------|------|------|------|
| 4 | Leap Year | | 2032 | 2060 | 2088 |
| 5 | 1 Year | 2005 | 2033 | 2061 | 2089 |
| 6 | 2 Year | 2006 | 2034 | 2062 | 2090 |
| 7 | 3 Year | 2007 | 2035 | 2063 | 2091 |
| 8 | 4 Year (Leap Year) | 2008 | 2036 | 2064 | 2092 |
| 9 | 1 Year | 2009 | 2037 | 2065 | 2093 |
| 10 | 2 Year | 2010 | 2038 | 2066 | 2094 |
| 11 | 3 Year | 2011 | 2039 | 2067 | 2095 |
| 12 | 4 Year (Leap Year) | 2012 | 2040 | 2068 | 2096 |
| 13 | 1 Year | 2013 | 2041 | 2069 | 2097 |
| 14 | 2 Year | 2014 | 2042 | 2070 | 2098 |
| 15 | 3 Year | 2015 | 2043 | 2071 | 2099 |
| 16 | 4 Year (Leap Year) | 2016 | 2044 | 2072 | |
| | | | | | |
| | | | | | |
| | | | | | |
| 28 | 4 Year (Leap Year) | 2028 | 2056 | 2084 | |
| 29 | 1 Year | 2029 | 2057 | 2085 | |
| 30 | 2 Year | 2030 | 2058 | 2086 | |
| 31 | 3 Year | 2031 | 2059 | 2087 | |

OPERATING INSTRUCTIONS

AUTOMATIC ANALOGUE (4R36/4R38/4R39)

- Calendar, Day Of the Week (4R36)
- Powered by movement or winding the crown

4R35

4R37

CROWN

- | | |
|--------------------------|--|
| a) Normal position | : winding up the mainspring (manual operation) |
| b) First click position | : date setting |
| c) Second click position | : time setting |

HOW TO USE

This watch is an automatic watch equipped with a manual winding mechanism.

- When the watch is worn on the wrist, the motion of the wearer's arm winds the mainspring of the watch.
- If your watch is completely stopped, it is recommended that you manually wind the mainspring by turning the crown.

How to manually wind the mainspring by turning the crown

1. Slowly turn the crown clockwise (in the 12 o'clock direction) to wind the mainspring.
2. Continue to turn the crown until the mainspring is sufficiently wound. The second hand will start moving.
3. Set the time and date before putting the watch on your wrist.

HOW TO SET THE TIME, DAY AND DATE (FOR CAL. 4R36)

- Check that the watch is operating, and then set the time, day and date.
 - The watch is provided with a day and date function and is so designed that the day and date changes once every 24 hours. The date changes around 12 o'clock midnight, and the day around 4:00 a.m. If AM/PM is not properly set, the date will change around 12 o'clock noon, and the day around 4:00 p.m.
1. Pull out the crown to the first click. (The second hand continues moving and the accuracy of the watch is unimpaired.)
 2. The day can be set by turning the crown clockwise.
 3. The date can be set by turning the crown counterclockwise. Turn it until the previous day's date appears.
Ex.) If today is the 5th of the month, first set the date to "4" by turning the crown counterclockwise.
 4. Pull out the crown to the second click when the second hand is at the 12 o'clock position. (The second hand stops on the spot.) Turn the crown to advance the hands until the date changes to the next. The time is now set for the a.m. period. Advance the hands to set the correct time.
 5. Push the crown back in to the normal position in accordance with a time signal.

HOW TO SET THE TIME (FOR CAL. 4R38 AND CAL. 4R39)

1. Pull out the crown to the first click when the second hand is at the 12 o'clock position. (The second hand stops on the spot.)
 2. Turn the crown to set the hour and minute hands to the correct time.
 3. Push the crown back in to the normal position in accordance with a time signal.
- Cal. 4R39 has a 24-hour hand, which moves correspondingly with the hour hand. When setting the time, check that the 24-hour hand is correctly set.

ACCURACY OF MECHANICAL WATCHES

- The accuracy of mechanical watches is indicated by the daily rates of one week or so. (Around 25 seconds per day +/-)
- The accuracy of mechanical watches may not fall within the specified range of time accuracy because of loss/gain changes due to the conditions of use, such as the length of time during which the watch is worn on the wrist, arm movement, whether the mainspring is wound up fully or not, etc.
- The key components in mechanical watches are made of metals which expand or contract depending on temperatures due to metal properties. This exerts an effect on the accuracy of the watches. Mechanical watches tend to lose time at high temperatures while they tend to gain time at low temperatures.
- In order to improve accuracy, it is important to regularly supply energy to the balance that controls the speed of the gears. The driving force of the mainspring that powers mechanical watches varies between when it is fully wound and immediately before it is unwound. As the mainspring unwinds, the force weakens.
Relatively steady accuracy can be obtained by wearing the watch on the wrist frequently for the self-winding type and winding up the mainspring fully everyday at a fixed time to move it regularly for the wind-up mechanical type.
- When affected by external strong magnetism, a mechanical watch may loss/gain time temporarily. The parts of the watch may become magnetized depending on the extent of the effect. In such a case, consult the retailer from whom the watch was purchased since the watch requires repair, including demagnetizing.

AUTOMATIC ANALOGUE (7S26/7S36)

- Hour, Minute, Seconds (24 hour hand for 4R39)
- Calendar, Day Of the Week (4R36)
- Powered by movement or winding the crown

a: Screwed-in position b: Normal position c: First click d: Second click

HOW TO START THE WATCH

To initially start your watch:

Swing it from side to side in a horizontal arc for about 30 seconds. This is an automatic mechanical watch.

** If the watch is worn on the wrist, the mainspring will be wound automatically through normal wrist movement.*

** If the watch is used without being wound up sufficiently, gain or loss of the watch may result. To avoid this, wear the watch for more than 8 hours a day.*

HOW TO SET THE TIME, DAY AND DATE

- Check that the watch is operating, and then set the time, day and date.
 - The watch is provided with a day and date function and is so designed that the day and date changes once every 24 hours. The date changes around 12 o'clock midnight, and the day around 4:00 a.m. If AM/PM is not properly set, the date will change around 12 o'clock noon, and the day around 4:00 p.m.
1. Pull out the crown to the first click. (The second hand continues moving and the accuracy of the watch is unimpaired.)
 2. The day can be set by turning the crown clockwise.
 3. The date can be set by turning the crown counterclockwise. Turn it until the previous day's date appears.
Ex.) If today is the 5th of the month, first set the date to "4" by turning the crown counterclockwise.
 4. Pull out the crown to the second click when the second hand is at the 12 o'clock position. (The second hand stops on the spot.)
Turn the crown to advance the hands until the date changes to the next. The time is now set for the a.m. period. Advance the hands to set the correct time.
 5. Push the crown back in to the normal position in accordance with a time signal.

ACCURACY OF MECHANICAL WATCHES

- The accuracy of mechanical watches is indicated by the daily rates of one week or so. (Around 25 seconds per day +/-)
- The accuracy of mechanical watches may not fall within the specified range of time accuracy because of loss/gain changes due to the conditions of use, such as the length of time during which the watch is worn on the wrist, arm movement, whether the mainspring is wound up fully or not, etc.
- The key components in mechanical watches are made of metals which expand or contract depending on temperatures due to metal properties. This exerts an effect on the accuracy of the watches. Mechanical watches tend to lose time at high temperatures while they tend to gain time at low temperatures.

- In order to improve accuracy, it is important to regularly supply energy to the balance that controls the speed of the gears. The driving force of the mainspring that powers mechanical watches varies between when it is fully wound and immediately before it is unwound. As the mainspring unwinds, the force weakens.

Relatively steady accuracy can be obtained by wearing the watch on the wrist frequently for the self-winding type and winding up the mainspring fully everyday at a fixed time to move it regularly for the wind-up mechanical type.

- When affected by external strong magnetism, a mechanical watch may loss/gain time temporarily. The parts of the watch may become magnetized depending on the extent of the effect. In such a case, consult the retailer from whom the watch was purchased since the watch requires repair, including demagnetizing.

CONTACTS

ADVERTISING & MARKETING

For information relating to advertising, displays, point of sale materials, incentive programs, website, dealer catalogues and consumer brochures.

Jason Lancett (Seiko):
(02) 9805 4651

Daniel Findlay (Pulsar/Lorus):

3 YEAR GUARANTEE

All SEIKO watches and clocks are covered by a 3 year guarantee. The guarantee covers defects in the material and workmanship from the date of purchase. As a SEIKO authorised dealer it is your responsibility to correctly fill in the guarantee with all the information required. The diagram on the right shows where to find the relevant information on the watch caseback.

In the case of incorrectly used guarantees, return them to SEIKO Australia or hand them to your SEIKO Australia Representative for free replacement, otherwise a charge for new guarantees will be applicable.

Global Service Network

SEIKO's dedication to quality extends throughout its service network in all corners of the world, extending the same dedication to excellence and the highest quality service to SEIKO customers everywhere.

For over 100 years SEIKO has stood for quality – in manufacture, design and service. Today, our SEIKO service centres strive to offer the highest standard of after-sales service and ensure lasting consumer satisfaction. In the Oceania Region, SEIKO Australia Pty Ltd has a network of branch offices, service centres and authorised service agents throughout Australia, New Zealand, Papua New Guinea, and the Pacific Islands.

For service, repairs and spare parts enquiries, please phone 1300 363 575 or email service@seiko.com.au

As one of the world's largest watch and clock manufacturers, Seiko gives you greater reliability, guaranteed quality and more choice when considering:

We can specialise our timepieces for corporate businesses or groups for:

- Service Awards
- Incentives & Rewards
- Product Launches
- Promotions
- Gifts for Employees or Clients
- Safety Awards
- Loyalty Programs
- Or any other business occasion.

Specialised Services Include:

- Printing a company logo on the dial of the watch or clock
- Engraving logos or personalised messages on the watch back or clasp
- Customised packaging
- Printing and engraving lead times approx 10 working days
- All products supplied in presentation boxes
- Full Seiko warranty applies to all models
